Reference: Southern California (SoCal) Metroplex Community Outreach – January and February 2017

Greetings:

The Federal Aviation Administration (FAA) signed a Finding of No Significant Impact and (FONSI) Record of Decision (ROD) for the Southern California Metroplex project on August 31, 2016. This is the FAA's final decision, and it enables the agency to move forward with implementing the project, which will replace dozens of existing conventional air traffic control procedures with new satellite-based procedures. The project encompasses most of Southern California and includes six major airports and 15 satellite airports. We undertook the project to improve airspace safety and efficiency by allowing for more optimized and efficient routing of aircraft into and out of Southern California.

The FONSI and ROD, as well as the Final Environmental Assessment, are available at:
http://www.metroplexenvironmental.com/socal_metroplex/socal_introduction.html.

I'm writing to let you know the FAA is planning community outreach workshops in support of the implementation of the project. The project is being implemented in phases and this outreach will be focused on communities where changes are occurring in March and April 2017. The community outreach will consist of both public information briefings and Internet-based webinars.

Public Information Workshops:

The public information workshops will be an open-house format where the public can attend anytime during the posted times to learn about the project. FAA representatives will provide a variety of information on the project and will be available to answer questions. Free public parking is available at the briefing locations, and surrounding street parking is available too. Spanish interpreters will be present for the briefings. If other language interpreters or accommodations are needed, please contact me at the number below. Logistical information regarding the briefings is as follows:
